Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

(1) The word "joined" in claim 1 was changed to "fused" in order to distinguish over the prior art which shows two fibers which are simply lain side by side and inherently held together by the same adhesive which joins the top and bottom halves of the pad together; as taught in the written description, the term "fused" implies that the end of the fibers are partially melted, or otherwise bonded together, as a side effect of being trimmed. See also claims 30 and 57.

(2) Claims 18 & 39 have been adequately explained by the applicant in his remarks.

(3) Claim 24 was allowed because the prior art only shows an optical sensor being used to generate a feedback signal for a single laser diode; there is no teaching of using a single optical sensor to adjust the light output of an entire "array" of LEDS.

(4) Claim 47 was allowed because the reference to Bennett only shows trenches in a substrate which are inherently formed as the optical cables are pressed into the substrate as the top and bottom halves of the substrate are pressed together; Bennett does not suggest "preformed" trenches which are deliberately cut into the substrate prior to joining the two halves together.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
